

Jørg Aarnes – Global Lead Hydrogen and CCS

Jørg holds a role as Global Lead for hydrogen and CCS within DNV Energy Systems, and has 25 years experience in the energy space, including some 15 years in CCS. Jørg has had leading roles in international standards development for CCS, including CSA Z741:12 and ISO 27914:2017, and in creation of frameworks for certification of sites and projects for geological storage of carbon dioxide. He has also led a large number of client projects in DNV related to qualification and verification of CO2 storage sites, risk assessments, and independent reviews.
